

CONRAD & COMPANY

3415 W. Craig Road, Suite 208, North Las Vegas, NV 89032
702.699.9034 www.goconrad.com

COMCASH was established in 1996. The product was specifically engineered to provide the most powerful, and flexible Point of Sale system available anywhere. The Delphi program makes it possible for COMCASH software engineers to customize the product to fit the needs of individual businesses. As a result, COMCASH has become one of the fastest growing POS developers in the nation.

The SQL server based version of COMCASH opens the entire retail industry to the power, flexibility and ease of use that have made COMCASH the leader in POS solutions. COMCASH is fully scalable to any size of operation or number of registers. Single users can enjoy the benefits that SQL brings to POS at no increase in cost. The largest, Tier One clients can now enjoy all that COMCASH offers, coupled with the speed and stability of SQL at a very modest price.

COMCASH HAS WHAT IT TAKES TO RUN YOUR POS BUSINESS
QuickService & Classic Retail Interface in the same Program!
