

The RTS Advantage

Cost Effective

Motion Detection

Remote Viewing

Alarm Notification

Digital Clarity

PTZ Control

Real Time Surveillance

The screenshot displays the RTS Sentry software interface. It features a 2x2 grid of camera feeds: top-left shows two men loading a white van; top-right shows a woman in a hallway; bottom-left shows a man at a counter; bottom-right shows a man crouching by a white car. To the right is a control panel with a 'Display' section (16 camera icons), a 'Recorder' section (16 recording icons), and buttons for 'Record All', 'Utility', 'Playback', 'PTZ', 'Full Scr', 'Log Off', and 'Exit'. At the bottom, it shows 'Supervisor: SUPER' and the date '2004-10-19 09:54:32'.

RTS SENTRY ESSENTIAL SERIES

The RTS Sentry is transforming the surveillance industry and is proving to be a reliable safeguard for the small to large business. Our sophisticated technology offers ideal capabilities for integrated systems to meet your surveillance requirements.

As an integral part of the surveillance solution, the RTS Sentry provides peace of mind and operates as a perfect site management instrument. The capability to remotely access the digital video from a PC, and monitor the camera system from a remote site is an important feature that enables the user to observe questionable activity while at home or on the road.
